

CUT HEAL'S SMART CHOICE GROOMING INSTRUCTIONS

HORSES

In your Grooming Kit all that is needed is clean towels; a soft body brush; a stiff brush; a mane comb and hoof care equipment. Within twenty minutes your horse will be clean, shiny and detangled for 3 – 5 days!

To apply SMART CHOICE shake the bottle and then mist any stains or mud spots. Towel these off the horse.

Then mist a palm size area of the towel and starting at the neck working towards the tail end of the horse, rubbing the towel against the lay of the hair. When one area of the towel becomes dirty move to another spot of the towel, mist lightly and then rub through the coat.

Repeat the above procedure to the horse's head, neck and body. For legs, mist each leg directly with SMART CHOICE and towel backwards through the hair. White legs may require a few applications to achieve a glistening white.

While the body application dries, groom the mane and tail. Spray SMART CHOICE directly on the tail, saturating the hair. Comb out all knots, ropes and tangles working from the ENDS TO THE TOP OF THE TAIL. Saturate the tail again, a lock of hair at a time; towel through to take manure and yellow stains out of the hair. Stained white tails might require several applications to make them truly white. Repeat the process with the mane.

The final step to achieve a SMART CHOICE shine is the easiest. Using a soft brush misted with SMART CHOICE brush the entire body to lay hair down and bring out the shine. If the horse has a long, thick, winter coat, a stiff brush may be necessary.

For touch-ups during shows, a soft brush misted with SMART CHOICE will give a show ring ready shine in seconds, erasing saddle marks and mud stains.

Finally, always use SMART CHOICE on a dry horse. No hoses and water required.

DOGS, CATS, GOATS AND RABBITS

For proper and simple application we recommend using clean towels for larger dogs and clean cotton gardening gloves for small animals in addition to normal grooming tools.

When grooming SHORT HAIREDD dogs, cats, goats and rabbits first shake the bottle then mist SMART CHOICE on a small towel or cotton gloves and rub upwards against the lay of the animal's coat. Use your fingertips to gently massage

skin and pick up hidden dirt. Through this method apply SMART CHOICE all over the animal, including the facial area, stomach and legs.

After thoroughly cleaning the animal, add a lustrous shine by misting a brush and brushing the pet's hair back down.

For all LONG HAIREED dogs, cats, goats and rabbits, spray SMART CHOICE directly on the animal. Saturate all mats and tangles and comb out, working UPWARDS FROM THE ENDS. If the hair dries while combing, re-saturate. Comb out all areas of the pet.

Spray pet again and towel or use cotton gloves, rubbing against the coat, removing dirt.

Finally, mist a brush with SMART CHOICE and brush normally. Pets may be touched up between groomings with a lightly misted brush or towel.

Finally, always use SMART CHOICE on a dry dog, cat, goat or rabbit. For dog and cat owners no kitchen sinks; bathtubs; showers or hoses and water required. Gone will be the days that grooming is a BIG ORDEAL inside or outside one's home!

CATTLE

First shake the bottle of SMART CHOICE and spray directly on their LEGS. Using a towel, rub the coat on their legs backwards. Spray a brush lightly and brush legs. After 2-3 applications of SMART CHOICE all manure stains will be gone.

Next spray SMART CHOICE directly on the body while using a blow dryer, blowing in upward motion. For marketing steers, this will enhance the hair coat. For Longhorn steers, after using the blow dryer, spray a brush lightly with SMART CHOICE and brush hair. You can also spray a towel and shine the horns.

Then spray SMART CHOICE on tail, saturating the end where the hair is longer. Towel out and comb end of tail STARTING AT THE BOTTOM, WORKING UP. If the tail is white or light colored SMART CHOICE will make the color brighter after 2-3 applications.

For the face, spray SMART CHOICE on a towel and rub the face. SMART CHOICE also works well on inside of the ears by spraying on towel and wiping out.

Finally, always use SMART CHOICE on dry cattle and use a towel rather than a smooth cloth.

LLAMAS

First shake the bottle of SMART CHOICE and using a blower, blow out coat to loosen debris and remove dust. While using blower to fan out hair mist entire body with SMART CHOICE and blow until dry.

It is helpful to have two people – one person uses the blower and the other brushes the fanned out hair. If only one person is grooming, lift hair and brush out from bottom working up.

Mist SMART CHOICE in heavily tangled areas to allow brushing without pulling or jerking hair.

Wet knee and hock areas with SMART CHOICE. Allow to stand 5 to 10 minutes. Dampen towel with SMART CHOICE and rub briskly to draw out dirt. Then use blower at 1” to 10” from wet areas until dry and fluffy.

Comb or blow hair until it lies naturally.

Finally always use SMART CHOICE on dry Llamas.
